Experience

Stable Money (Fintech) - Data Intern, Business Team	Feb 2026 – Present
- Fixed 5% control-group contamination in A/B tests by tracing incorrect API events, restoring experiment reliability. - Resolved key UX flaws in FD flows, increasing conversion by 3%. - Built Mixpanel dashboard for UI/UX experiment, enabling 5% performance lift and full rollout. - Analysed bond behaviour via ATS and credit segmentation, revealing yield-driven investment patterns.	

Education

Dhirubhai Ambani University	2024 – Present
MSc Data Science - Ongoing	Gandhinagar, Gujarat
M.S.Ramaiah University of Applied Science	2021 – 2024
BSc Honors Statistics - Completed	Bangalore, Karnataka

Technical Skills

Product & Analytics: SQL, Mixpanel, A/B Testing, Funnel Analysis, Cohort Analysis, Experimentation, Root Cause Analysis
Data & Programming: Python (Pandas, NumPy), PostgreSQL, Data Modelling, ETL, Data Warehousing
BI & Visualization: Excel, Tableau, KPI Tracking, Data Visualization
Machine Learning: Scikit-learn, Predictive Modelling, Feature Engineering, EDA, Statistical Analysis
Tools & Collaboration: Unleash, GitHub, VS Code, Stakeholder Communication, Requirement Gathering

Projects

E-Commerce Business Intelligence Analytics MS Excel, SQL	🔄
Collaborated with data platform teams (simulated) to collect and integrate complex e-commerce data by engineering a 14-table normalized database. Solved a critical product problem by using advanced SQL to conduct a root-cause analysis that identified the key drivers of customer churn, creating a significant customer experience impact. Modelled the financial impact of customer retention strategies to identify and recommend product optimizations, presenting a final data-driven strategy to stakeholders.	
Predictive Modeling on CO2 Emission Project Documentation	🔄
Architected and validated a machine learning framework for prediction and forecasting, analyzing a dataset of 27,000 records from data collection to final model evaluation. Engineered a high-performance model that outperformed industry benchmarks by 39%, achieved by systematically reducing RMSE through advanced feature selection and hyperparameter tuning. Delivered a robust and reliable final model, validated using k-fold cross-validation to ensure stability and performance in a production environment.	
Executive BI Dashboard Microsoft Office, Google Applications	🔄
Developed an interactive Tableau dashboard to visualize a dataset of 180k+ records, translating raw data into a clear visual story for stakeholders. Translated complex data into actionable insights by visualizing critical KPIs (e.g., attack counts, casualties), a skill directly applicable to analyzing A/B test results and enabling rapid strategic assessment by leadership. Analyzed disparate socio-economic indicators to identify key correlations and provide a data-driven basis for strategic evaluation.	

Achievements

- Certified in SQL for Data Science by UC Davis (Coursera)
- Tableau Business Intelligence Analyst Certification – Tableau (May 2025)
- Completed Excel Skills for Business – Coursera (Feb 2023)
- Completed Business Analytics for Management Decision – NPTEL (May 2024)
- Competed in Amalthea 2024 (IIT Gandhinagar), designed NLP-based chatbot to analyze user input for distress signals.
